In 2019, CMN Hospitals raised \$6,140,949 for Beaumont Children's.

Lexi was diagnosed with Type 1 Diabetes 2 weeks before her 12th birthday. She wasn't feeling great, was really thirsty, had to use the bathroom constantly, and lost 20 pounds in one month.

When Lexi was diagnosed, she was hospitalized at Beaumont Children's for three days. Her care team made sure she was comfortable with her diagnosis and taught her and her family everything they needed to know about Type 1 Diabetes. They learned how to check sugar, fill syringes, dose for corrections, count carbohydrates, dose for carbs eaten, and about the different types of insulin.

Beaumont Children's helped Lexi to be comfortable with this change that will impact the rest of her life and relayed information so she could understand it as a 12-year-old. Knowing this was scary, Mya the therapy dog came to visit and cuddle with Lexi in bed. Child Life Specialists did crafts and activities with her to take her mind off everything going on. They blew bubbles when taking blood and changing IV's. They even brought video games for Lexi and her brother and sister to play. All of this was funded by Children's Miracle Network and their generous corporate partners.

HOW DONATIONS HELPED LEXI:

The Child Life team at Beaumont Children's is entirely supported by funds from Children's Miracle Network Hospitals. Child Life services were an incredible comfort to Lexi and her family during her time in the hospital, providing comfort, distractions, and entertainment.
