HOW YOUR DOLLAR MAKES MIRACLES AT CHILDREN’S HOSPITALS

SPECIAL SERVICES FOR KIDS LIKE JONNY
Treatment for Jonny’s Acute Lymphocytic Leukemia has included multiple lumbar punctures, high dose chemo appointments and long hospital stays, but he won’t let cancer define him. This caring, fun-loving child is constantly raising awareness through media appearances and CMN Hospitals events and puts the needs of others first—even on the hardest days. In his words, “Tough times don’t last...tough kids do!”

CUSTOM NEEDS FOR KIDS LIKE BRAYLEN
Now six, Braylen is a confident boy who easily communicates with others. At two however, he was unable to use his words to express himself and was growing increasingly frustrated. Thanks to fundraising efforts, Braylen was enrolled in the RE/MAX Communication Preschool Program, designed to serve children who have been diagnosed with speech and language impairments. “We are beyond grateful!” says his mother.

BREAKTHROUGH RESEARCH FOR JONAH
Soon after Jonah’s birth, he was taken to the NICU with labored breathing. He needed his first cranial surgery at 6 months of age and was diagnosed with Crouzons Syndrome, which causes the bones of the skull to close prematurely and can cause fluid buildup on the brain. He’s had 20 surgeries so far, and amenities provided by CMN Hospitals have helped him cope and have provided comfort along the way.

SPECIALIZED CARE FOR CHLOE
Chloe was born with a cytoma tumor in her head. She has recently been diagnosed with parainfectious encephalopathy (a spinal cord infection running to her head) that causes seizures, change of personality, cognitive difficulties and memory loss. Chloe also has cerebral palsy which affects her auditory and visual memory. Chloe LOVES Maroon 5 and more specifically Adam Levine! She lives, eats, sleeps and breathes music.

Beaumont CHILDREN’S
