COVID-19 Visitation Information

Thank you for trusting us with the care of your family.

We know how important it is for families to be together. Unfortunately, the COVID-19 pandemic has made it difficult and unsafe to be together in-person as we try to stop the spread of COVID-19.

We look forward to the day when COVID-19 is no longer a threat and we can welcome family and friends without restriction.

General Information

EVERYONE must:

- Be free of COVID symptoms and a COVID diagnosis and must not be waiting for COVID test results.
- Wear a face mask that covers the nose and mouth at all times. If you do not come with a mask, one will be given to you.
- Practice social distancing, keeping 6 feet from others at all times.
- Stay in the patient's room at all times except for quick trips to the bathroom or to purchase food.
- Clean hands each time they enter and exit a patient care area.
- Remove and throw away gloves.
- Leave the Beaumont building as soon as the visit is over.

A person visiting may be asked to leave a patient care area if safety or social distancing cannot be maintained.

Each person visiting must complete a Health Assessment by answering COVID-19 screening questions each time they come to Beaumont.

- People screening positive will not be allowed to visit.
- People screening negative will be given a "sticker" that must be worn at all times.

Each patient must answer COVID-19 screening questions when arriving for an outpatient appointment or procedure. Those screening positive will be given directions on how to continue to their appointment safely.

Personal protective equipment (PPE) must be worn at all times.

COVID-19 Screening Questions

- ✓ COVID diagnosis in past 14 days
- ✓ COVID test pending
- ✓ Exposure to someone with COVID within past 14 days
- ✓ Fever > 100.0° F
- ✓ New cough
- ✓ New shortness of breath
- ✓ New flu like symptoms such as body aches
- ✓ New onset diarrhea
- ✓ Recent loss of taste or smell

Help prevent the spread of infection:

- Stay home when you are sick.
- Wash your hands often with soap and water or hand sanitizer, especially before eating, after coughing or sneezing, and after using the bathroom.
- Cover your mouth and nose when you cough or sneeze by coughing or sneezing into the elbow of your arm.
- Throw tissues away immediately and wash your hands.
- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose and mouth.
- Clean frequently touched objects and surfaces using a household cleaning spray or wipe.
