SPECIALTY SERVICES

Beaumont Heart Center – Featuring the Ernst Cardiovascular Center with specialty clinics for treating complex heart and vascular conditions; the Ministrelli Women’s Heart Center; and the Tyner Center for Cardiovascular Interventions, a hybrid OR/catheterization suite blending catheter-based procedures with minimally invasive surgery for structural heart disease.

Beaumont Orthopedics – offers a full range of specialized care, including minimally invasive surgery, implants and trauma surgery. One of the nation’s highest-volume joint replacement surgical centers.

Beaumont Cancer Institute – accredited by the Commission on Cancer and designated as a Blue Cross Center of Distinction for the Treatment of Complex and Rare Cancers. One of only 34 community sites in the U.S. Awarded a five-year National Cancer Institute Community Oncology Research Program grant providing access to leading cancer research trials.

Beaumont Surgical Services – offers minimally invasive treatments including advanced endoscopic, laparoscopic and robotic approaches for the treatment of complex surgical conditions. Delivery of chemotherapy or radiation during surgery is also offered.

Beaumont Urology – internationally recognized for endoscopic, robotic, laparoscopic and traditional surgery. Beaumont’s Women’s Urology Center is the first in the Midwest dedicated to women’s urological care and sexual dysfunction.

Beaumont Neuroscience – treating all neurological conditions of the brain and spine for children and adults including stroke, epilepsy, Parkinson’s and Alzheimer’s disease and migraine, among others.

Danialle & Peter Karmanos Jr. Family Birth Center, and the **Karmanos Center for Natural Birth** – offer services to make traditional or natural birth safe and comfortable. Services include maternal-fetal medicine and neonatal intensive care.

Digestive Health – specialized care including bariatric surgery and medically-supervised weight loss programs.

Eye Institute – board-certified ophthalmologists provide complete eye care, from routine eye exams to serious vision problems.

Transplantation – offers innovative and collaborative approaches for the treatment of end-stage renal and liver disease. The transplant team works with state and regional organ and tissue recovery programs to provide patients access to donors from across the region.
