## Amount Generally Billed (“AGB”) Calculation

BHSH System (including substantially related entities) does not charge Financial Assistance Policy (“FAP”)-eligible patients more for Emergent and other Medically Necessary care than amounts generally billed (AGB) to those who have insurance covering such care. Rather, BHSH System provides Emergent or other Medically Necessary care free of charge to any patients who meet the eligibility criteria for financial assistance under this Policy. BHSH System uses the look-back method and calculates an AGB percentage for each hospital facility by dividing the sum of all of the amounts of its claims for Emergency and other Medically Necessary care that have been allowed by Medicare fee-for-service in combination with private insurance for the preceding twelve (12) month calendar year, by the sum of the associated gross charges for those claims.

AGB is determined by multiplying the gross charges for all care provided to the FAP-eligible patient/guarantor, including Emergency and other Medically Necessary care, by the applicable AGB percentage in the following table.
