RELATED EXPERIENCE

SIU School of Medicine Research Program, Urology Department, Springfield, IL 2013
Medical Student Researcher

Worked with the urology faculty under Dr. Alanee, as we worked to develop an online summary of diseases in order to better educate patients. The goal of the project was to describe prostate cancer, kidney cancer, bladder cancer, testicular cancer, and penile cancer.

SIU School of Medicine Research Program, Surgery, Springfield, IL 2013
Medical Student Researcher

Worked with the urology faculty under Dr. Kohler, gathered information regarding urology resident education, specifically in the area of reviewing and rating skills following a surgery in order to better evaluate them. Worked in researching education methods as well as creating reviewing apps and programs. The parameters focused on outcome, feedback, and ease of use. Unpublished at this time.

Institute for Healthcare Improvement, SIU School of Medicine 2012
Medical Student Participant

Worked to complete the Institute for Healthcare Improvement student training. This program's goal is to make individuals in healthcare aware of problems, train them, and develop new strategies to help improve patient safety, benefiting both the patient and the institution at the same time.

SIU School of Medicine Research Program, Orthopedics Department, Springfield, IL
Medical Student Researcher 2012

Worked with the orthopedics faculty under Dr. Saleh, gathered information regarding the postoperative outcomes depending on the type of preoperative education that they receive in order to adapt to our own study. The parameters focused on cost, length of stay, and healing time; unpublished at this time.

Illinois State Medical Society MECO Program, Memorial Hospital, Belleville, IL

Medical Student Intern

2011

Worked throughout different departments of the hospital, assisting and learning from the doctors on staff there, as well as developing skills in talking to and interacting with various patients.

University of Tulsa Summer Research Program, Tulsa, OK

Student Researcher

2009

Worked as a member of a research team investigating oncogene and tumor suppressor gene activity via manipulation in mice; unpublished as of this time.

University of Tulsa Summer Research Program, Tulsa, OK

Student Researcher

2008

Worked as a member of a research team as we investigated bee behavior and ethanol's influence in foraging; unpublished as of this time.

PROFFESIONAL QUALIFICATIONS

- Skills in programs such as Microsoft Office Word and Excel, Internet. ACLS trained and qualified.
